

CARE & CLEANING INSTRUCTIONS

Your Coastal shower enclosure can provide years of service and beauty with a minimum of care and maintenance. Cleaning your enclosure safely and effectively takes the right cleaner. With minimum maintenance and the right cleaner, your bath enclosure should be beautiful for years to come.

The key is to understand what types of **cleaners to use and to avoid**. Many cleaners labeled for use in bathrooms can damage the metal finish or scratch the glass of an enclosure.

A short list of **cleaning agents that should be avoided** because they either damage the metal or scratch the enclosure surface includes:

- Vinegar or vinegar-based products
- Abrasive or soft-abrasive powders and liquids
- Bleach or bleach-based cleaners
- Steel or Teflon pads

Coastal cleaning products can be purchased at Amazon.com to help ensure your Coastal shower door stays clean and relatively maintenance-free.
